

Nylite

Spinnaker cloth for the quality conscious cruising sailor

Our All Purpose spinnaker styles balance performance with durability for applications that require economical fabric. **Nylite 90** is a coated style for improved porosity but compromise a little on weight with constructions that are tough and tear resistant. **Nylite 150, 250 and our New 350** are rugged ripstop constructions stabilized with a resin impregnated finish. With high break strength and tear resistance, these are excellent fabrics for heavy air kites or larger cruising spinnakers or A-sails. **Nylite 90 and Nylite 150** are offered in a full color range so boat owners can customize the look of their spinnakers.
