

## Premium Heavyweight

Cloth engineered for sailing cruise ships and tall ships

The sailcloth requirements for large working boats and tall ships are very different from the standard cruiser. Prolonged UV exposure from daily charter service and extended voyages on training ships puts a premium on cloth strength and durability. Our Contender Heavy Weight constructions use 1000 denier and larger yarns in tightly woven constructions for the ultimate tear, chafe, and UV resistance. We finish these constructions with a medium Polyreg finish for a balance of soft hand and bias stability.

### ► Comparative features

### ► Weight range Premium Heavy Weight

Style	Construction		Width	Weight	
	Warp	Fill		g/m2	oz/smy
<b>HW 12</b>	1000	x 1000	54" / 137 cm	510	11.9
<b>HW 13</b>	1000	x 1500	54" / 137 cm	560	13.0
<b>HW 14.5</b>	1000	x 2000	54" / 137 cm	620	14.5
