

ZL CODE GP BLACK ARAMID LAMINATES

Designed for Grand Prix applications

➔ *Designed for radial cut sails*

ZL Code GP Black Aramid Laminate is a film/film ultralight laminate that provides optimal strength-to-weight performance. This laminate range features high modulus aramid warps and a UPE crossply construction, available in a weight range from 85 g/m² to 240 g/m². Primarily intended for use in Code sails, staysails, and gennakers on large catamarans, the ZL Code GP Black Aramid Laminates excel in delivering a balance of ultra-lightweight composition, high strength, minimal stretch, tear resistance, stability, and trans-directional strength. Additionally, the multi-pass lamination process employed in its production process enhances bonding strength and minimizes fiber fraying, providing a clean look and long-lasting performance.
